

Dear Parents,

Byron Bay High School Science Faculty is excited to announce its partnership with Atomi.

Byron Bay High School is committed to providing the best possible learning environment to foster student success. A critical step in creating this experience is equipping both staff and students with the right tools to support learning, both on campus and at home. By using the latest innovations in technology, we can encourage greater academic success for all students.

This letter outlines what Atomi is and what you can expect from our partnership.

What is Atomi?

Atomi is one of Australia's leading online teaching and learning platforms for schools. Atomi produces thousands of syllabus specific videos and resources aimed at increasing the academic performance of students across Australia.

Atomi works closely with several government schools to help teachers and students achieve more by increasing teaching flexibility and extending learning beyond the classroom.

What does the partnership involve?

We have currently partnered with Atomi across the Y11 and 12 cohorts. [Here is a linked list](#) of the subjects offered. We will provide this access to Atomi for these students and staff members with the aim of improving learning in and outside of the classroom.

Atomi videos and formative assessments will be used in the classroom as a teaching support resource as well as better informing teaching with data around each student, whilst being issued outside of the classroom to increase support for students anywhere, anytime. Students are able to access Atomi both through the work their teachers set on Google Classroom, the school's learning management system, and independently in their own time. Atomi also offers extra resources, such as Revision Sessions and a Study Skills course.

By using Atomi Revision Sessions, students can select the scope, time, and type of questions they wish to revise in a study session. Atomi will then compile a unique revision session for

students based on their preferences. Atomi revision sessions are designed to give students flexibility and variety in their study regimes.

The Atomi Study Skills course is designed to target the 'academic care' component of a students' learning experience. The course follows the arc of student learning across a senior year, providing resources to target each stage; from goal setting, all the way through to procrastination.

What are the benefits of this platform?

This partnership is aimed at creating value for both the school and each individual student.

- **Increased results** - at the core, Atomi is designed to work alongside staff to increase academic performance, providing students the tools to achieve the best possible results.
- **Unlimited access** - each student will receive complete access to 1000's of premium curriculum aligned videos designed for success.
- **Increased support** - Atomi is available to students 24/7 on all devices. This means students will receive support beyond the classroom at times when teachers are not accessible.
- **Better learning** - staff members are able to teach more effectively with Atomi resources by issuing videos for homework and receiving data on individual student use and progress. This facilitates deeper learning and better exam preparation.
