

# Byron Bay High School

## Bring Your Own Device (BYOD)

### Minimum System Requirements

Byron Bay High School actively supports students who wish to bring electronic devices to school to assist with their learning. These devices should meet the minimum specifications outlined below.

All students have access to FREE copies of Microsoft Office and the Full Adobe Creative Cloud suite via their student portal for both Windows and OSX (Apple).

This software can only be installed on a computer (not Chromebooks or tablets such as iPads).

### Minimum requirements

While most new devices will meet these requirements, parents and students are encouraged to choose a **laptop** to maximise learning opportunities.

#### Apple Laptops

All new OSX laptops are compatible with the school's wireless network.

#### Windows Laptops

	Minimum	Recommended
Operating system	Windows 10	Windows 10 or newer (Home, Pro or Education)
Hard Disk	256GB	SSD and an additional 500GB if working with video/graphics
RAM	8GB	16GB
Wireless (see below)	<b>5GHz 802.11n OR 5GHz 802.11ac</b>	
Battery life	6hrs	

**The school's wireless operates on 5GHz.**

**Devices that do not meet these requirements will be unable to connect to the internet at school.** If you have an older laptop you can purchase a 5GHz 802.11ac USB adapter from most computer stores.
